

## **Thank you to our Main Sponsors**

UKELA acknowledge and are very grateful to the main sponsors of the conference, without them and the other conference sponsors, it would not be possible to hold an annual conference at such good value – thank you to all of them.

**ThirtyNine**  
ESSEX STREET

[www.39essex.com](http://www.39essex.com)

Thirty Nine Essex Street Chambers has one of the Bar's leading teams in the field of Environmental law. Chambers & Partners 2011 quoted "Its environment group sits very well within the set and proves "an extremely modern and knowledgeable team that is a breath of fresh air in terms of its transparency and commercial understanding." and were winners of "Environmental and Planning Set of the Year in 2007 and 2008. Thirty Nine Essex Street Chambers includes many of the leaders at the bar. Its members possess a wealth of experience in the area, having acted as both advocates and advisors. The Environmental and Planning Team consists of leading practitioners who are widely regarded as combining a strong academic background with pragmatism and versatility, and who are easy to work with.

Chambers has been involved in a number of leading cases in recent years, including those involving issues of climate change; compulsory purchase and compensation; contaminated land; environmental impact assessment/strategic environmental assessment; energy and energy projects; nuclear energy; flooding; highways, footpaths and rights of way; minerals; nature conservation; nuisance; pollution prevention and control/environmental permitting; planning and environmental prosecutions; transport projects; village greens and commons; waste, landfill and waste projects; and water and utilities.

Landmark Chambers is the UK's leading chambers offering integrated advocacy and advice in four key areas of law: Planning, Public, Property and Environmental law. We are modern, forward-thinking and innovative. Landmark is described as the **"first choice for planning and environmental matters"** and in addition to our environmental regulatory work, our barristers are experts in the environmental aspects of town and country planning. With our strength in public law, we are the natural choice for environmental challenges in the higher courts. Our property barristers complete the package, with experience at all levels of advising on environmental issues in this area, including contaminated land and nuisance. With such strength and depth, Landmark is at the forefront of developments in environmental law at both domestic and European levels. All of our environmental barristers are members of the Environmental Law Association (UKELA) and the Environmental Law Foundation (ELF). Members also contribute to the leading textbook Environmental Law (OUP, 2nd ed., 2008) The **Landmark Chambers Centre for Environmental Law (LCCEL)** is a pioneering initiative for the Bar and cements Landmark's position at the forefront of developments in this area.

[www.exponent.com](http://www.exponent.com)

Exponent is a large multinational scientific and engineering consulting firm providing services to industry, industrial and trade associations, insurance companies, law firms and governmental agencies. Exponent is often engaged on challenging environmental issues, damage assessment, product registration and risk assessment/analysis, high profile engineering and regulatory problems. Exponent has the largest environmental and engineering forensic consultancy in the world and has, for example, provided causal analysis of explosions such as the 1988 Piper Alpha oil platform in the North Sea and the Buncefield Depot in Hertfordshire in 2005. Recent work includes support during the response to the Gulf of Mexico Deepwater Horizon incident, the age dating of wastes in contaminated land sites in the U.K., dioxin/furan source evaluation at a steel mill in Taranto, Italy, and testimony at the World Court for damage assessment of pulp mill pollution in South America.

Exponent has approximately 900 staff located in offices in the USA, UK, Switzerland, Germany and China. Our multidisciplinary team of scientists, physicians, engineers, and regulatory consultants perform both in-depth scientific research and analysis, and very rapid-response evaluations to provide our clients with the critical information that both day-to-day and strategic decisions can require. Exponent is certified to ISO 9001.
